

Piano Lab is forming a fun, flexible team of talented teachers who are committed to our school and to the success of each and every piano student.

Piano Lab is a dynamic, group learning environment serving piano students ages 5 and up. Our school opened in June, 2017 and has experienced steady enrollment through the year. As we prepare for our summer sessions, we are looking for teachers to help serve our growing family of students.

The mission of Piano Lab is to promote lifelong musicianship. We believe that it is the benefits of ensemble learning such as peer interaction, varied activities, measurable achievements and peak performance opportunities, that maintain the enthusiasm and discipline students need to achieve musical fluency.

Classes are grouped by age and skill level and can have up to 8 students. We are a year round program with weeklong sessions in the summer and weekly classes throughout the school year. We use a combination of curriculum including the Mayron Cole method for ensemble piano along with studies in improvisation, composition, ear training and music history.

Teacher Responsibilities:

- Lead one hour classes of up to 8 beginning or intermediate piano students - this includes presenting information, facilitating games and activities, performing evaluations, managing classroom behavior and building a strong rapport with students and parents.
- Prepare for classes based on the curriculum and manual provided - Piano Lab has methods and resources that should be utilized, but every class is different and the teacher must be confident making changes and enhancements to ensure that the students are well served. This can include researching and incorporating additional activities, provide extra attention where needed, supplementing assignments for advanced students and more.
- Communication - Teachers will report classroom experiences to the studio owner on a regular basis. There may be times when they will be asked to communicate directly with parents regarding student needs or to collect information. Teachers will also be asked to provide anecdotes, videos and the like for posting on FB or including in newsletters.

Salary \$30-\$50/class depending on experience and training needs. Salary may be renegotiated after initial training period and again after first 3 months on staff.

Requirements: Candidates must be able to demonstrate their competence and passion for music. Applicants must have experience working with children.

Working Hours: Classes run between 1pm-8pm daily with the majority of availability needed in late afternoon/early evening hours .

If you are interested in a teaching position please visit www.StudentsLovePianoLab.com to learn more about the program and contact Marilyn O'Leary at Marilyn@StudentsLovePianoLab.com or call (703) 887-4133.
